Portfolio

Professional Summary

Pre-final year Engineering student at SVNIT Surat with experience in full-stack development, backend systems, and AI-integrated applications. Familiar with core computer science fundamentals including Data Structures, Algorithms, and Object-Oriented Programming. Skilled in building scalable web applications using Next.js, MongoDB, and Python-based backend systems with strong problem-solving, collaboration, and self-learning abilities.

Technical Skills

- Languages:** C++, Python, JavaScript, TypeScript
- Core Fundamentals:** Basic Data Structures & Algorithms, Object-Oriented Programming, DBMS Fundamentals
- Frontend:** React.js, Next.js, Tailwind CSS, Framer Motion, Recharts
- Backend:** Node.js, FastAPI, REST APIs, JWT Authentication
- Databases:** MongoDB, Mongoose
- AI & Data:** Machine Learning, Retrieval-Augmented Generation (RAG), Pandas, NumPy
- Developer Tools:** Git, GitHub, Postman, Razorpay, Cloudinary, NextAuth.js

Technical Projects

FinTrack – Intelligent Financial Dashboard [Next.js, Python, FastAPI, RAG] — GitHub Repository | Demo

- Designed a full-stack financial dashboard that enables users to analyze CSV/Excel transaction data through interactive visualizations and categorized spending analytics.
- Built Python-based data processing pipelines using Pandas and NumPy for efficient aggregation, cleaning, and analytics generation.
- Developed AI-powered financial insights using the Retrieval-Augmented Generation (RAG) architecture with vector embeddings and LLM integration.
- Optimized frontend responsiveness and dashboard rendering using Next.js and Recharts for improved user experience.

Get Me a Chai – Crowdfunding Platform [Next.js 14, MongoDB, NextAuth.js] — GitHub Repository | Demo

- Developed a secure full-stack crowdfunding platform that supports creator profiles, personalized URLs, and real-time payment processing.
- Implemented OAuth-based authentication and session management using NextAuth.js with secure credential handling.
- Designed scalable backend APIs and MongoDB schema structures for efficient user and transaction management.
- Integrated Razorpay payment gateway and Cloudinary media optimization for seamless user experience.

SrtLinks – URL Shortener Platform [Next.js 15, MongoDB, JWT] — GitHub Repository | Demo

- Designed a scalable URL shortening service with secure JWT-based authentication and dynamic route-based redirection.
- Implemented password encryption, middleware protection, and automated email verification workflows using Node-mailer.
- Improved backend maintainability through modular API design and reusable server-side components.
- Enhanced application security using Bcrypt.js and protected dashboard access through middleware authorization.

Certifications

The Ultimate Job Ready Data Science Course – CodeWithHarry View Credential

- Learned practical applications of Python, Pandas, NumPy, machine learning, data preprocessing, and visualization techniques.

FLY (Finding the Leader in You) Program – Foundation For Excellence View Credential

- Completed a leadership program focused on problem solving and innovation.

Leadership & Activities

- Executive Member, Association for Computing Machinery (ACM)
- Junior Developer, Google Developer Groups on Campus (GDGC)
- Collaborated in technical events, development initiatives, and student engineering activities.

Education

Sardar Vallabhbhai National Institute of Technology (SVNIT), Surat
Bachelor of Technology in Electronics and Communication Engineering

2024 – 2028
CGPA: 7.5+/10
